

A user will come to the website for the first time and load the main page of shareIT.com and the result is a page that appears like the one above

The user can then choose to search any related posts or pages within the system using certain key words that are available

*Post a status*

If user wants to post a status anonymously or as guest, a guest id is assigned to the user and user can make anonymous post

## Login

☒ Remember me

However, for a user to follow other posts and join groups, they have to login using the main window as above
